

Set up paper WG2 ‘Permanence’; part 1

Objective: Overview of crediting & timing options with respect to permanence

- Introduction (0.5 page)
- Project types (1.5 page)
- Measurement and accounting issues (1.5 page)
- Carbon Markets and policy options (1.5 page)

Total: 5 pages

Project Types

- 7 categories: schematic graphs + explanation what project types are represented by each graph.
 - Plantation,
 - FM-spacing,
 - FM/tree enhancement/low tillage,
 - afforestation,
 - FM/RIL/pest control,
 - replace SRC by forest,
 - avoid deforestation...
- Pooled projects: schematic representation and explanation

Measurement & Accounting

- Measuring: after project – verification
- Modeling: Project, pools, verified,...
- Buffering: ++ / --
- LT average selection: choice time frame;
(project duration vs. monitoring period)
- Incentives: timing, credit valuing, simplifying
- Discounting: no, time based, regulation based

Carbon Markets & Policy options

- C-markets:
 - Financial products: off-sets, buy & rent, futures, options
 - Property rights, contracts, duration...
- Policy options:
 - Direct incentives, choice of accounting systems, fix base C-price, market interventions...
 - > Choice of limited set of scenario's...
